ABSTRACTS

The Appearance of Emgel Versus Erygel in Female Volunteers with Mild to Moderate Acne: A Photographic Evaluation, 155A

Clinical and Statistical Interpretation of 'Normal' Laboratory Values in Clinical Trials, 148A

Clinical Trial Management Techniques by Mobile Coordinators, 154A

Communication Across Geographical Locations, 156A

Deering Research Foundation: A New Model for a Proprietary Hospital-Physician Research Organization, 153A

Development of a Networked Macintosh Computer System: An Invaluable Clinical Trial Management Tool, 158A

Development Plan for Clinical Research Associates, 153A

Disclosure of Financial Information to Research Subjects During Informed Consent: Preliminary Results, 163A

Economics of Drug Development, 152A

Efficient Use of Physicians in Phase I Clinical Research, 148A

Establishing a Clinical Research Study Coordinator Group in a University Hospital Setting, 160A

Ethical Consideration of Clinical Trials in Epilepsy: A Clinical Research Coordinator's Perspective, 147A

Implementation of Fax-Based Documentation in the Processing of Ambulatory Electrocardiographic Recordings, 151A

'Item by Item' Planning for Performance of a Protocol, 161A

The Medical Device Industry Versus the Pharmaceutical Industry: A Comparison of Product Development, Clinical Investigation, and the Approval Process, 162A

A Multi-Faceted Education and Incentive Program for Inpatient Subject Recruitment in One Urban Hospital, 146A

New Drug Development&&mdashAlzheimer's Disease, 145A

Posters to Introduce Pharmaceutical Trial Protocols to Hospital Staff: An Alternative to Poorly Attended Meetings and Unread Memos, 161A

Preliminary Evaluation of Research Patients' Understanding of Informed Consent, 165A

Quantifying Time in a Clinical Research Center, 152A

Recruiting Patients in a Cost-Effective Manner, 159A

Renal Function Testing in the Clinical Research Setting, 145A

Selecting a Central Laboratory Facility for Clinical Research, 156A

Selling the Research Concept to Managed Care, 157A
